Weather Based Irrigation Controllers

Irrigation controllers using historic or real time data on environmental conditions for a specific location and landscape - such as soil moisture, rain, wind, plants' transpiration rates, and, in some cases, plant type and more - to adjusting irrigation schedules, providing more precise amounts of water to maintain healthy growing conditions. Weather Based Irrigation Controller models must be International Irrigation Association / SWAT approved. Incentives are based on controller station capacity.

The following WBIC models are SWAT approved and currently qualify for rebates:

Alex-Tronix   www.alextronix.com

Enercon Plus (4-24 stations) / Smart Clock (6 stations)
Universal Smart Module

Aqua Conserve   www.aquaconserve.com

Aqua ET-6 Controller Series:
ET-6 (6 stations) / ET-9 (9 stations) / ET-14 (14 stations)
Aqua ET-8 Controller Series:
ET-8 Wall Mount unit (8, 16, 24 or 32 stations)
ET-8 Pedestal unit (8, 16, 24, 32, 40 or 48 stations

Smart Controllers 105, 204 & 205
HermitCrab™ Universal Smart Controller

Hunter   www.hunterindustries.com

Hunter models must be paired with either the Solar Sync (SS) or Wireless Solar Sync (WSS) modules:

ET System with Pro-C Controllers:
PC-300-SSYNC / PC-300i-SSYNC
Solar Sync connected to Hunter Pro-C Conventional (PCC) Controllers:
PCC-600/ PCC-600i / PCC-900 / PCC-900i
PCC-1200 / PCC-1200i/ PCC-1500 / PCC-1500i
Hunter (ICC) Controllers:
ICC-800-PL / ICC-800-M / ICC-800-SS
Hunter (IC) I-Core Controllers:
IC-600-PL / IC-600-M / IC-600-SS / IC-600-PP
Hunter (XC) X-Core Controllers:
XC-200i / XC-400i / XC-600i / XC-800i /
XC-400 / XC-600 / XC-800
Hunter (XC) X-Core Controller - Home Depot:
RTL0101-XC800SS

HydroPoint   www.hydropoint.com

WeatherTRAK ET Plus Controllers:
WTPLS-06 / WTPLS-09 / WTPLS-12 / WTPLS-18 / WTPLS-24
WeatherTRAK ET Pro / WeatherTRAK ET Pro Central

Central Computer Irrigation Controllers

These sophisticated systems are designed for larger irrigated areas such as golf courses, parks, schools and large commercial complexes. These systems consist of a master controller (often a PC computer) which tells the valves at remote locations to open and close. In most cases the central controller is used to program separate satellite controllers that are closer to the valves.

The following CCIC models are approved and currently qualify for rebates:

Acclima   www.acclima.com
CS 3500
